Key messages for cholera prevention

Drink and use safe water. Safe water is water that is bottled with an unbroken seal, has been boiled, or has been treated with a chlorine product.

Wash food with safe water and either peel food or cook it well, eat it hot, and keep it covered.

Wash hands often with soap and safe water (after using the toilet, before eating or cooking, after eating, after cleaning baby's feces). If no soap is available, brush hands often with ash or sand and rinse with safe water.

Use latrines or bury your feces. Do not defecate in any body of water.

Keep latrines clean.
