Convocation Speaker

Atul Gawande, MD, MPH

Atul Gawande, MD, MPH, is the assistant administrator for Global Health at the U.S. Agency for International Development, where he oversees a bureau that manages over \$4 billion, with a footprint of over 900 staff committed to advancing equitable delivery of public health approaches around the world.

The Bureau for Global Health focuses on work that improves lives everywhere—from preventing child and maternal deaths to controlling the HIV/AIDS epidemic, combating infectious diseases, and preparing for future outbreaks.

Prior to joining the Biden-Harris Administration, Gawande was a practicing surgeon at Brigham and Women's Hospital and a professor at Harvard Medical School and the Harvard T.H. Chan School of Public Health. He is the founder and was the chair of Ariadne Labs, a joint center for health systems innovation, and of Lifebox, a nonprofit making surgery safer globally. He also co-founded CIC Health, a public benefit corporation supporting pandemic response operations

nationally, and served as a member of the Biden transition COVID-19 Advisory Board. From 2018–2020, he was also CEO of Haven (an Amazon, Berkshire Hathaway, and JP Morgan Chase health care venture). In addition, Gawande was a longtime staff writer for *The New Yorker* magazine and has written four *New York Times* best-selling books: *Complications*, *Better*, *The Checklist Manifesto*, and *Being Mortal*.

He is a member of the National Academy of Medicine and the winner of two National Magazine Awards, AcademyHealth's Impact Award for highest research impact on health care, a MacArthur Fellowship, and the Lewis Thomas Award for science writing.

The School Mace

The Johns Hopkins Bloomberg School of Public Health Mace, carried by a Chief Marshal of the Society of Alumni, was first used in the 1986 Convocation Exercises. The head of the mace displays the names of individuals who have served as Dean of the School and their dates of service. The symbols on the seal illustrate the School's dedication to education, research, and service in the diverse fields of public health through the promotion of health preservation, control of disease, and delivery of health and medical services.

The Regalia and Symbol

The history of academic attire can be traced to the medieval period when scholars were also clerics and wore the costume of their monastic order. The hood was originally a cowl attached to the gown, which could be slipped over the head for warmth in the unheated buildings in which they worked. From this necessity evolved the tradition of academic regalia which today is used to identify members of the academic institution by level of degree, academic field, and awarding institutions.

The distinguishing mark of the gown is the sleeve: master—an oblong sleeve open at the wrist; doctor—a bell-shaped sleeve with three velvet bars. Academic subjects are identified by the color of the hood trimming. The lining of the hood signifies the colors of the granting institution. The Johns Hopkins University displays a hood lining of gold. The color of the tassel denotes the degree. It may be black or gold thread or the same color as the hood trim. The colors associated with the different academic subjects are:

International Declaration of Health Rights

To be recited by the Class of 2024

Based on a statement created by the students, faculty, and alumni on the occasion of the 75th anniversary of the Johns Hopkins School of Hygiene and Public Health

We as people concerned with improving health and well-being globally, do hereby commit ourselves to the pursuit and promotion of health rights of all human beings. The enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being. It is not a privilege reserved for those with power, money, ability, or social standing.

Health is more than the absence of disease, but includes prevention of illness and injury, development of individual potential and a positive sense of physical, mental, and social and spiritual well-being.

Access to affordable health care is a human right. Health services should be effective, safe, equitable, and responsive to individual needs.

Health care for older adults should preserve dignity, respect, and aim to support quality of life.

Health begins well before a pregnancy that is freely chosen; continues with the healthy development of the child in a safe, stable, and nurturing environment, supported by community; and extends through adulthood and across generations.

Health depends on our environment, local, and global. Work across disciplines and national boundaries is necessary to safeguard our planet and its impact on the health of all people.

Health depends on the access to basic life essentials including food, clean water and air, safe and adequate housing, quality education, and productive employment.

Health depends on protection from exploitation and discrimination based on race, ethnicity, gender, sexual orientation, age, ability, religion, political belief, or economic or social condition including citizenship and caste.

Health requires peace, with communities able to thrive free of oppression, conflict, and war.

Achieving health equity is everyone's responsibility and requires a commitment to advancing the physical, environmental, economic, social, and political conditions necessary to support all people in the world attaining their full health potential.
