*Lunch and Listening Session: Exploring Contextual Prevention Strategies for Making the Digital World Safer for Children - WeProtect Global Alliance

A session dedicated to identifying and addressing gaps in prevention strategies for child sexual abuse and exploitation online. As online exploitation and abuse continues to grow, and we understand more about the dynamics of how it occurs, there's an increasing call to ensure prevention efforts look at how community, social and policy influences can also make the digital world safer for children. This session will provide a reflective and open space for participants to share their experiences, insights and suggestions, as we explore the ecosystem in which child sexual abuse and exploitation online occurs, and where the levers to prevent it lie. The listening session will inform the development of WeProtect Global Alliance's global prevention framework.

 To Zero is a timebound initiative that brings together leaders including visionaries, scientists, researchers, innovators, activists and donors from across the world to build a vision of what it will take to effectively end childhood sexual violence within a generation and help mobilize new resources to accelerate progress towards that goal. To achieve this, To Zero is currently holding a set of conversations with different stakeholder groups to explore what is currently working and not in the field of childhood sexual violence; surface powerful new initiatives and innovations; and chart our individual and collective aspirations for the future. The To Zero session at Envision will be an opportunity to learn more about the field-level vision that is now emerging and to bring a powerful, prevention-focused lens to the conversation.
