

UNITED REPUBLIC OF TANZANIA

26,924 deaths
from pneumonia and diarrhea
in children under 5, equating to
12 / 1000 live births

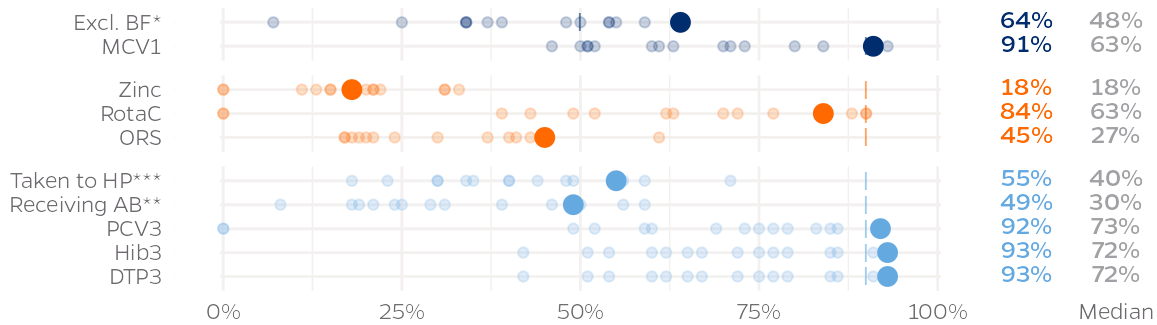

GAPPD Scores

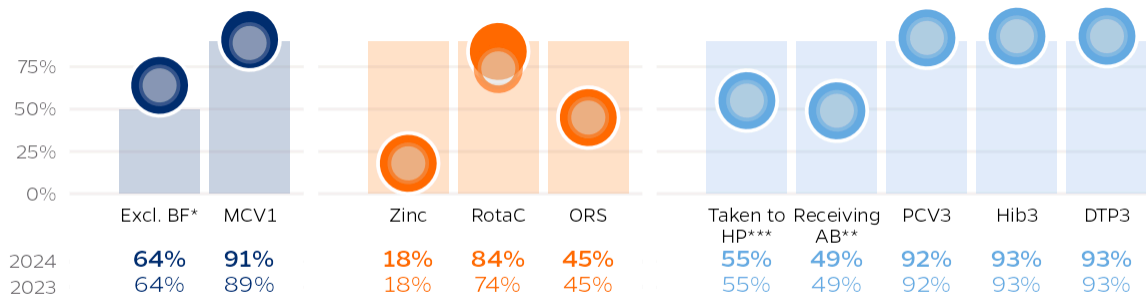

United Republic of Tanzania experienced increases in RotaC coverage from 75% to 84%, and in MCV1 coverage from 89% to 91%; GAPPD targets have been reached for five out of 10 indicators.

Breakdown by Indicator

Here we show the country's performance on each indicator against the targets (the vertical lines). The other 14 countries in this year's global report are shown as smaller faded dots. The columns on the right provide the score for this country and the median score across all 15 countries.

Below, the GAPPD targets are represented by the height of the faded bars. The solid dots indicate the percentage of coverage achieved by the country this year; the faded dots are last year's measurements.

* Exclusively Breastfed; ** Receiving Antibiotics; *** Taken to Health Provider
