

Six research areas will receive particular attention and investment

**Strategic
targeted focus
on six key areas**

**Reinforce Core
Platform Strengths**

**Build New
Strengths to
Address Needs**

**Continue to focus
on groups
experiencing
disproportionate
impact**

**Reduce inequities and
disease burden for
women, children and
adolescents**

**Build leadership in the
effects of **climate change**
on infection risk, disease
burden & evidence-based
adaptation and
mitigation strategies**

**Improved health of
Indigenous populations**

**More effective,
equitable, and
responsive **health**
systems**

**Build leadership in
research on **lifelong**
impacts of nutrition**

**Strengthen our work in
Humanitarian health**

**Alignment
Collaboration
Integration**

**Cross-cutting focus areas;
Vaccines, Nutrition and others**

**Cross-cutting methodological approaches:
AI, Digital, Implementation Science, Data Science, Social & Behavioral Approaches**
